ECONOMICS STUDENT ASSOCIATION

ESA strives to create opportunities and experiences for our members to nurture their development as leading business professionals. We provide both academic and career support through a variety of events and services: tutoring and study groups, prominent speaker events, networking opportunities, career trips to various employment hubs, and more. We also host social events for members to interact with and get to know people in the UW community who share common interests. ESA serves to be a bridge connecting undergraduate economics majors with professionals, academics, and fellow students with similar interests. This group is open to anyone with an interest in economics.

THE FED CHALLENGE

The Fed Challenge encourages members to think critically about the components of the U.S. macroeconomy and the factors that influence that economy. Members work with Economics Department faculty to learn about the role of the Federal Reserve in making and implementing monetary policy decisions. In addition to learning about policy, selected members have the opportunity to travel to Chicago to compete against other universities in the regional collegiate Fed Challenge competition. University teams play the role of monetary policymakers by analyzing economic conditions and recommending a course for monetary policy. This is a great way to learn about real-world economic policy with a little friendly competition tied in.

WOMEN IN ECONOMICS

WE (Women in Economics) strives to promote awareness of gender disparities and barriers within economics for women and to educate and improve the community through outreach, mentorship, and by facilitating conversations among women in the field at all levels. WE is open to any actively enrolled student engaged in the study of economics at UW-Madison, at either the undergraduate or graduate level. WE hosts speaker events, economics panels, study groups, and more.

EQUILIBRIUM

Equilibrium is UW-Madison's undergraduate journal of economics produced by students. It showcases and summarizes research of economics undergraduate students as well as profiles accomplished alumni and faculty. The journal is published on an annual basis in Spring. There is also an opportunity for you to write online articles and research. To get involved with Equilibrium, whether it is graphic design, research, editing or writing, contact uwequilibrium@gmail.com
